Telehealth Calls from the RITA device...

RITA Follows The C.A.Q.E. Model

Is The Model Aligned With Healthcare Standards...?

- ☑ **Cost** - Affordable and Cost-effective for both the patient and the Healthcare Provider
- ☑ **Access** - Priority of providing accessible healthcare services
- ☑ **Quality** - Prioritize delivering high-quality healthcare services 24/7
- ☑ **Experience** - A welcoming environment offering personalized care using technology and science to provide an excellent encounter with a qualified Healthcare Professional

“I like to combine the business model with the standard healthcare model of C.A.Q.E. RITA checks all the boxes and is a excellent system for patients to receive proper care at an affordable price. The network of qualified professionals for patients to access is in place to help them get the care they need.” Will Craghead, P.A.

Marketing

A Health & Wellness Strategy Can Reduce Workers Comp Claims by 80% - and Sick Days by 75%

Healthy employees have fewer insurance and workers comp claims.

- Organizations often struggle with driver retention and keeping their drivers healthy.
- Obese employees cost 11x more in medical costs than non-obese employees, and 85% of injuries are with obese workers.
- Healthy employees are far more productive and happy.

- Studies show for every \$1 spent on wellness programs, reduces medical costs by \$4!
- Johns Hopkins University found that 85% of employees injured were obese
- Personal medical problems complicate recovery time - making it longer, more expensive
- The employer is on the hook to cover medical care until the employee returns to work
- Implementing a Health & Wellness Strategy can reduce Workers Comp Claims by 80%, and Sick Days by 75%
- The top three health issues that drivers struggle with are 1) Obesity, 2) Sleep Disorders, and 3) Chronic Fatigue

Investing into a Wellness Strategy Can Save \$17,917 per employee!

Pertexa Healthcare Technologies, Inc. – RITA (Remote Intelligent Telehealth Assistant)

SPECIFICATIONS

BACKGROUND OF THE INVENTION

- Field of the Invention**

The present invention is in the technical field of mobile equipment. More particularly, the present invention is for applications of telemedicine.
- Background Information**

Mobile carts, semi-autonomous and fully autonomous telemedicine devices are being used for a variety of healthcare applications such as emergency rooms, intensive care units and rural clinics. In a typical telemedicine visit, the physician is remote and a medical assistant brings the telemedicine device into the room with the patient.

RITA Summary & Specifications 1
